EXPERIENCE

Full Stack Developer

January 2024 – February 2025

Amatrons Technology Pvt. Ltd

Remote

- Designed and established user-friendly websites, including optimized checkout pages, resulting in a 25% increase in user clicks and a subsequent 31% boost in customer purchases.
- Administered the full lifecycle of software development for 9 critical company projects, achieving 100% on-time delivery while remaining 7% under budget.
- Increased user engagement by 25% using CSS3 animations, JavaScript-driven graphics, and Bootstrap Carousel sliders.
- Streamlined form validation and input handling with JavaScript and jQuery, reducing user errors by up to 40%.
- Redesigned the navigation menu using Bootstrap and JavaScript, cutting the average time to find key features by 22%.

Freelance Web Developer

Jun 2022 – Present

Self-initiated Projects

Remote

- Delivered custom web solutions across various projects, including responsive UIs, backend integrations, and real-time notifications, all on time and on budget.
- Streamlined form flows and API integrations, significantly reducing client-reported issues.

PROJECTS

InsightMetrics Dashboard | [Live Demo](#)

- Built analytics dashboard with Laravel backend and React/Bootstrap frontend
- Integrated real-time sales, user, campaign, and social metrics via REST APIs and AJAX
- Created interactive KPI charts and graphs for quick insights
- Implemented notifications and order-management alerts

Employee Task Management System | [Dashboard](#)

- Built full-stack task management system with PHP backend and HTML/CSS/JS frontend
- Implemented secure CRUD REST APIs for task creation, assignment, updates, and deletion
- Designed dashboard for task assignment, deadline setting, and progress tracking
- Added real-time AJAX notifications and deadline alerts

CERTIFICATION

University of Colorado
